

VISION/WEIGHT SYSTEM

The vision/weight system can be integrated into existing conveyor systems, according to customers requirements.

The vision/weight system, can be used to differentiate and detect damage on products coming in a constant flow. By means of interface to down stream equipment, the products can be diverted in different directions or ejected (quality control).

Technical data:

Capacity:	Up to 1200 boxes/h
Load:	15 Kg, 5 gram intervals.
Measurments (LxWxH):	2600mm x 1300mm x 2800mm (With Ejector-belt)

Features:

- Interface to Up/down stream equipment.
- Easy adjustment of weighing intervals.
